

SUMMARY

I am a passionate and dedicated full stack web developer with a strong foundation in both front-end and back-end technologies, including HTML, CSS, JavaScript, React, Bootstrap, Node.js, Express, and MongoDB. With hands-on experience in developing responsive and dynamic web applications, I am committed to writing clean, efficient, and maintainable code. Continuously driven to learn and grow, I am eager to contribute to innovative projects and start my professional journey as a valuable member of a dynamic development team.

PROJECTS

REAL-TIME WEATHER APPLICATION

using React (for front-end designing) and weather Apis (to get the real time weather of different places)

- Enter the name of place you want see or know the weather and press search (the weather of the place you searched will be displayed with some more weather attributes) .
- Responsive Design

TODO LIST

using React (for front-end designing) and local storage (to store the tasks)

- The Task can be created , modified or deleted based on the users needs , it refreshes in real time automatically no need to refresh the page for every single operation .
- Responsive Design

CRM for (Admin-Employee Relationship)

The overall functionality has been finished , user interface design is in progress

- front-end : React , Bootstrap .
- back-end : Node.js , Express.js
- database : MongoDB
